ENGLISH LANGUAGE AND COMPOSITION

SECTION II

Total time—2 hours

Question 1

(Suggested time—40 minutes. This question counts one-third of the total essay section score.)

The following passage concludes an essay by Edward Abbey about Aravaipa Canyon in New Mexico. Read the passage carefully. Then write an essay in which you characterize Abbey's attitudes toward nature and analyze how Abbey conveys these views.

What are Abbey's attitudes toward nature?

Message Method Effect

Once, years before, I had glimpsed a mountain lion in this canyon, following me through the twilight. It was the only mountain lion I had ever seen, so far, in the wild. I stopped, the big cat stopped, we peered at each other through the gloom. Mutual curiosity: I felt more wonder than fear. After a minute, or perhaps it was five minutes, I made a move to turn. The lion leaped up into the rocks and melted away.

Nature can be awe-inspiring

diff. time

whoa

all nature, not just the canyon.

actions mirror each other

lost track of time

We see no mountain lions this evening. Nor any of the local deer, either Sonoran whitetail or the desert mule deer, although the little heart-shaped tracks of the former are apparent in the sand. Javelina, or peccary, too, reside in this area; piglike animals with tusks, oversized heads, and tapering bodies, they roam the slopes and gulches in family bands, living on roots, tubers, and innards of barrel cactus, on grubs, insects, and carrion. Omnivorous, like us, and equally playful, if not so dangerous. Any desert canyon with permanent water, like Aravaipa, will be as full of life as it is beautiful.

time shift - today

So Abbey has returned to the canyon b/c he enjoys his time there; knows the animals/wildlife.

Description: inquis + respects the animals

humans are a danger to nature.

We stumble homeward over the stones and through the anklebone-chilling water. The winter day seems alarmingly short; it is.

imagery

Short lit + short clause = short day + short time spent in nature

We reach the mouth of the canyon and the old trail uphill to the roadhead in time to see the first stars come out. Barely in time. Nightfall is quick in this arid climate and the air feels already cold. But we have earned enough memories, stored enough mental-emotional images in our heads, from one brief day in Aravaipa Canyon, to enrich the urban days to come. As Thoreau found a universe in the woods around Concord, any person whose senses are alive can make a world of any natural place, however limited it might seem, on this subtle planet of ours.

imagery

time

time

Any time in nature is time well spent

"The world is big but it is comprehensible," says R. Buckminster Fuller. But it seems to me that the world is not nearly big enough and that any portion of its surface, left unpaved and alive, is infinitely rich in details and relationships, in wonder, beauty, mystery, comprehensible only in part. The very existence of existence is itself suggestive of the unknown—not a problem but a mystery.

Disagrees w/ Fuller

Nature has power to enlarge our lives & experiences

humans -

summation of his view.

We will never get to the end of it, never plumb the bottom of it, never know the whole of even so small and trivial and useless and precious a place as Aravaipa. Therein lies our redemption.

Nature is an endless beautiful mystery that can save us from the monotony of life + ourselves

—Down the River, 1982
